PROJECTS / OPEN-SOURCE

Spotify Clone | [Link](#)

HTML, CSS, JavaScript

Developed a functional Spotify clone using HTML, CSS, and JavaScript, replicating core features like responsive design, interactive UI components, and media controls. Implemented a user-friendly interface with structured layouts and music playback controls to enhance user experience. This project strengthened my front-end development skills and my ability to recreate popular UI designs.

Netflix Clone | [Link](#)

HTML, CSS

Built a Netflix clone using HTML and CSS with a responsive layout and structured content sections. Designed an intuitive UI featuring movie banners and categories, improving my front-end development and UI design skills.

Jarvis - AI Virtual Assistant | [Link](#)

Python

Created Jarvis - AI Virtual Assistant using Python, capable of recognizing voice commands, performing automated tasks, and providing intelligent responses. Integrated speech recognition, task execution, and real-time data retrieval to enhance user interaction. This project improved my expertise in Python, AI, and automation.

Heritage App | [Link](#)

CSS, TypeScript, JavaScript

SIH-1648 Solution: Smart India Hackathon 2024

Developed a multilingual chatbot-based ticket booking system with voice assistant to streamline museum entry and ticketing. Key features include:

Automated bookings (gate entry and shows) with integrated payment gateway

Multilingual support for accessibility

Data analytics for improved museum decision-making

Enhanced customer service and reduced human errors
